

Did you know there was a pill that could prevent HIV?

PrEP (pre-exposure prophylaxis) is a pill that can be taken daily to reduce the risk for contracting HIV. Studies have shown PrEP to be 90% effective and is approved for use by the FDA.

If you are interested in learning more about PrEP, Be-PrEPared is here to help.

What is Be-PrEPared?

An online resource toolkit and health education materials to increase knowledge and build capacity for reducing HIV/AIDS among women of color. The project integrates HIV/AIDS prevention into strategies for improving overall health and well-being, and the use of PrEP as an option for HIV prevention.

How to use Be-PrEPared?

Access the toolkit for HIV/AIDS prevention and comprehensive health information to combat HIV/AIDS in women of color. Can also tailor health promotion materials and health education content to meet outreach needs.

Where to find Be-PrEPared?

For more information on HIV/AIDS & PrEP, strategies for improving health and well-being, the eCurriculum learning module and facilitator's guide, visit our website
